#### TOOLS NEEDED

- #1 Phillips Screwdriver
- 10 & 12mm Socket Wrench
- Needle Nose Pliers
- Less than 1 hour

**Yamaha V Star 1300  
Fuel Injected Models**

**INSTALLATION INSTRUCTIONS FOR P/N 65003**

**INTRODUCTION:** Congratulations on your purchase of the Fuelpak Fuel Management System for fuel injected Yamaha V Star 1300 motorcycle. Please take the time to read the entire instruction manual before attempting to install. DO NOT adjust the Fuelpak until you have thoroughly read the instruction manual and the unit is fully installed. If you have questions, please call (562) 921-0071.

**SUMMARY:** To achieve the optimum performance from your application, it is recommended that you install a high performance air filter in conjunction with this unit. The Fuelpak will be installed in-line the factory injector wiring harness and the throttle position sensor. The Fuelpak will be tucked under the seat next to the tool tray.

**PLEASE NOTE: FUELPAK USE REQUIRES A HIGH PERFORMANCE AIR FILTER.**

# FUEL INJECTION MANAGEMENT SYSTEM

## INSTALLATION INSTRUCTIONS

1. Be sure the main switch is in the off position during the installation process. Failure to do this will cause the "check engine" light to be set.
2. Remove seat exposing the tool tray and battery.
3. Remove the (2) 12mm Hex head bolts securing rear of tank. Prop up the rear of the tank.
4. Locate and unplug the white 4-pin connector under left side of tank as shown in figure 1.
5. Route Fuelpak as shown in figure 2. Plug Fuelpak white connectors to the factory connectors unplugged in step 4.
6. Connect brown and green wires to the negative side of the battery.
7. Route Fuelpak long black wire under right side of tank and down to the horn as shown in figure 3. Disconnect the factory black / white wire from horn. Plug in Fuelpak long black wire to horn and then connect factory black / white wire to terminal on Fuelpak black wire.
8. Locate the throttle position sensor on the throttle body located on right side of the tank. As shown in figure 4, attach T-tap to yellow / black wire on throttle position sensor. Connect Fuelpak violet wire to T-tap.
9. Using supplied Velcro, mount Fuelpak next to tool tray as shown in figure 5.
10. Reinstall tank with (2) 12mm Hex head bolts removed in step 3.
11. You are now ready to set-up your Fuelpak.

## HOW IT WORKS

## ENTERING VALUES

1. Remove Fuelpak clear case cover by removing all four screws, **save hardware**.
2. Turn on **main** power with key, but do not start engine. Fuelpak display should light up, if not, turn power off and verify the connectors are fully seated.
3. Refer to Fuelpak Setting Reference to locate the Setting Values specific to your bike and exhaust system. If you do not find your setting, visit [fuelpakfi.com](http://fuelpakfi.com) or call tech support at (562) 921-0071.
4. Starting with mode 1 selected, press the value (+) or the value (-) buttons to input the correct value as indicated in your Setting Value. After entering your first value, press the mode select button to move to mode 2 and enter the value. Continue until you have entered the value for each of the first 18 mode positions. Each time the value (+) is pressed, the value increases by one number. Each time the value (-) is pressed, the value decreases by one number. (Please refer to the "How It Works" section directly above if you have questions about this step.)
5. **As the next procedure, after you have entered in your values for the first 18 modes, press the mode select button to move to mode 19. Fully twist open the throttle and return to idle position to calibrate the Fuelpak to your bike.**
6. By pressing the mode select button twice, move to mode 21 and verify that it reads "0" with the throttle closed, "50" at approximately half-throttle and "99" when fully opened; if not, repeat step 5. Do not proceed to step 7 until mode 21 is verified.
7. Enter any other mode values as required for your application.
8. Turn off power.
9. Reinstall clear cover, tuck Fuelpak under seat area and reinstall seat.
10. You are now ready to ride.

## IN THE EVENT OF A MALFUNCTION, PLEASE CHECK THE FOLLOWING

## TECH SUPPORT

1. Turn off main switch then verify all connectors are fully seated.
2. Be sure setting values are correct for your application.
3. Verify throttle calibration, step 5 in Entering Values.
4. Check harness for cuts, scrapes or abrasions.
5. Make sure the battery is fully charged and the charging system is operating correctly.
6. Call technical support at (562) 921-0071

## WARRANTY INFORMATION

**WARRANTY:** Your Fuelpak unit is warranted against defects in materials and workmanship for the period of 90 days from the original retail purchase. In the event of an alleged defect in material or workmanship, Fuelpak's responsibility is strictly limited to repair or replace the defective product. Fuelpak shall not be responsible for (a) labor, transportation, or other incidental charges; (b) consequential or other damages incurred by use of any product. Fuelpak offers no other warranty beyond this limited warranty. This limited warranty does not apply to products which have been (a) modified or altered in any way; (b) subjected to adverse conditions, such as misuse, neglect, accident, improper installation

or adjustment, contaminants, corrosion, or faulty repair; or (c) used in applications other than those recommended by Fuelpak. To initiate a warranty process, the consumer must first call technical support to receive a return authorization number. The product must be returned to Fuelpak complete with a dated receipt and a return authorization number.
